

#### ADVANTAGES

- Inherently leak-free design when installed in dedicated hardware
- Corrosion resistant and low-dusting construction
- Predicted removal efficiency and lifetime by Camfil's proprietary software
- Typical target gases: hydrogen sulfide, VOCs, ozone, formaldehyde, nitrogen dioxide, and other acids and bases
- The conical shape provides the highest removal efficiency and lowest pressure drop
- 30% lighter than metal cylinders
- Ergonomic filter design for improved handling

#### Application

The most reliable molecular filter for high efficiency and long-term control of molecular contaminants in sensitive buildings and process industries. They may also be used in odour removal applications in pulp and paper mills and wastewater treatment plants, or lighter applications such as airports, cultural heritage buildings, and commercial offices.

#### Frame

ABS

#### Gasket

Outlet seal, molded TPE

#### Media

Activated Carbon; Impregnated Activated Carbon; Impregnated Activated Alumina

#### Max Temperature (°C)

80

#### Min Temperature (°C)

-21

#### Installation Options

Front access mounting frames and side access housings are available. See related products below.

#### Comment

Universal mounting knobs to accommodate 1.5 or 2 mm mounting frames.  
Sixteen (16) XG's are applied per 610 x 610mm (24" x 24") opening.  
Can be filled with any loose-fill molecular media.  
CamCarb XG 2600 = Length 452mm & Diameter 146mm  
CamCarb XG 3500 = Length 595mm & Diameter 146mm

Filter performance will be affected if used in conditions where T and RH are above or below the optimum conditions.

#1 - Other models with different media options are available. High-performance media will be selected in accordance with the type of application.

#2 - Pressure drop at maximum rated airflow.

<sup>^3</sup> - Filled with UL-approved media
